

News From the Pond

Room 6

For the Week of September 14-18

Open House

Thank you to those who were able to attend our open house. Thank you also for your understanding about my leaving early and the alternate conference times.

Reading

We continued developing our predicting skills, expanding them to our independent reading and other subjects as well. We also worked on identifying story elements; characters, setting, problem, and solution. When your child is reading at home ask them about the story elements in the book they are reading.

Science:

We created weather symbols and wrote about different weather clothing and activities.

Math:

Students wrote numbers in expanded form to identify the value of each digit. $57 = 50 + 7$

Social Studies

Students identified traits of good citizenship.
