2024-2025 COURSE GUIDE

24-25 Course Selection Process & Schedule

Students will begin course selection for the following school year in February. Students are encouraged to familiarize themselves with the Buena Vista course guide and the Omaha Public Schools graduation requirements. Each student will meet individually with their counselor in the spring for a planning session which will include locking in selections for courses for the following year. It is important students consider course choices and discuss with families and teachers and case managers to prepare for course selection with their counselors. Students' abilities, interests, 504 and IEP plans, and individual goals are essential factors when making selections.

During February and March, students select and finalize their courses for the FOLLOWING school year.
Please refer to the online Buena Vista Course Catalog (available at ops.org/BuenaVista). The course catalog includes a course planner to outline required and elective courses, as well as course descriptions with grade levels and prerequisites.

10th – 12th Grade Course Selection

During late January and February; current Buena Vista students will be directed to update their **Academic Planner in their student portal** during their Bison Block class. They will have until February 23th to work with their parents, guardians, and teachers to select the appropriate classes in the planner and return their signed course selection sheet to their Bison Block teacher. *The course selection sheet will be signed by the parent/guardian, the student, and the counselor and saved as a record of selections.*

Between February 23th and March 6th, high school counselors will meet with Buena Vista students 1:1 to finalized and verify course selections, level placement, career pathways, and alternative electives. Selections will be locked in at this time. *Once locked, the counselor must be contacted to make adjustments before the end of the school year.*

9th Grade Course Selection

Between February 26th and February 28th, incoming 9th grade students will receive High School Course Selection presentations at their middle school to hear about the course opportunities available to them and begin making selections. They will take their schedule planning worksheet home to discuss with family and get a parent / guardian signature on the sheet.

Beginning February 29th, incoming 9th grade Bison will meet 1:1 with a high school counselor at their middle school, to select their courses for the following school year. The student's signed plan will be kept as a record. Students will receive a copy. *Once locked, the counselor must be contacted to make adjustments.*

Making Course Changes

Following spring registration, students can adjust courses based on conflicts in their schedules. Course changes after the spring are only allowed under the following circumstances:

- If a course was completed during summer school a student can advance to the next level
- If a course was failed during the previous year and therefore a student cannot advance
- If there is a schedule conflict that cannot be adjusted without dropping or changing a course
- If a student needs to meet graduation requirements
- Administrative discretion due to safety or behavior concerns

The U.S. Army Junior Reserve Officers' Training Corps (JROTC) is one of the largest character development and citizenship programs for youth in the world. The National Defense Act of 1916 established organized JROTC programs at public and private educational institutions. In 1964, Congress expanded the program to all military services and changed from active duty to shared support from the services and schools. As congressionally mandated by Title 10 United States Code, Section 2031, each military service must have a JROTC program to "instill in students in United States secondary educational institutions the values of citizenship, service to the United States, and personal responsibility and a sense of accomplishment." JROTC's mission, "To Motivate Young People to be Better Citizens", is the guide post for the program's success.

The U.S. Army's JROTC program currently operates in more than 1,700 public and private high schools, military institutions, and correctional centers throughout the United States and overseas. The JROTC faculty is led by nearly 4,000 instructors who are retired from active duty, reserve duty, or National Guard Army service. Instructors are trained and qualified in accordance with the National Defense Authorization Act 2007 to teach and mentor approximately 314,000 JROTC Cadets annually.
