Questions & Answers for
Bid # 24-045

Q1. In your specs, I think there may have been a error for Maximum Rotor Thickness and Maximum Drum Width. I cannot find a current brake lathe that will meet those specs. Below is an example of current common specs for brake lathes.

A1. The specifications indicated are a maximum range which allows vendors to present their product in the bid proposal submission that best meets the product specifications as outlined.

Q2. Will the bid be reissued with correct specs?

A2. Due to the above explanation, an addendum will not be issued.

Q3. The bid adaptor package listed for bid is incomplete. Are there existing adaptors that will be utilized?

A3. The adaptors specifications outlined is currently used in the District's fleet.
