Section Descriptions

Pacing guide - Pacing guides are timelines showing content to cover at specific points over the course of a year. This includes all the information needed for teachers to draft lesson plans. Includes items for a particular unit such as:

- academic vocabulary lists
- common assessments
- connections to district adopted curriculum resources
- essential questions
- content standards and indicators
- critical content and skills

Standards, strands and indicators – These are concise, written descriptions of what students are expected to know and can do within the course. Generally, standards are first adopted by the state and then the Omaha Public Schools Board of Education adopts the final versions used for the courses.

Scope and sequence - *Scope* is the material or skills to be taught, and *sequence* is the order in which you teach the information. This is brief and is used as an overview of the progression of learning (e.g. K-5, 6-8, 9-12).

Proficiency Scales/Proficiency Level Descriptors - Proficiency scales or descriptors are written for a content standard or concept. They define what students should know and can do for each level of learning.

Academic Vocabulary List with Definitions – This list includes the terms that should be taught using the Marzano 6-Step Vocabulary Process and has the appropriate definitions to terms listed here. There should be approximately 90 terms per course/grade level content area for the year. Additional content specific vocabulary is listed within the Pacing Guide.

District Adopted Resources – This lists the core materials (textbooks, web resources, and supplemental materials) selected for the course as approved by the Omaha Public Schools Board of Education.

Unit 1: Southwest Asia

Overview: How do people live with each other when they believe different things and have different values? In our own families, we often struggle to live under the same roof and work together. In Southwest Asia and North Africa, people deal with these issues on a daily basis. This unit will discuss the diversity in the beliefs and values of Southwest Asia and North Africa towards their resources, economics, land use, and religion. The conflict over the land of Israel paints a clear picture of what can happen when different people with strong beliefs live in the same area.

Unit 2: Africa

Overview: When you think about the continent of Africa, what images, thoughts, sounds, and people do you imagine? If you said rainforests, tribal life, beautiful landscapes, and interesting cultures, you would absolutely correct. If you said modern cities, technology, European influence, and independence, you would also hit the mark. This unit will discuss the incredible diversity of Africa and tell the story of how modern Africa was shaped through its history.

Unit 3: East and South Asia

Overview: Look at the manufacturing tag in your shoe. For almost everyone, that tag will read “Made in _____” – and it won’t be in the United States. In fact, that country will probably be in East and South Asia. In the last one hundred years, East and South Asia has become a strong contributor to the world’s economy. This unit will examine how life has changed in China and India as they have grown their economies and moved toward a modern society.

Course Standards Overview

Standards: At the highest level of generality, content area standards include a set of broad, overarching content-based statements that describe the basic cognitive, affective, or psychomotor expectations of students. They reflect long-term goals for learning. These comprehensive statements are not grade level specific and cover the big ideas of the course.

Indicators: Under each standard are indicators, which further describe what a student must know and be able to do to meet the standard. Indicators are performance, based statements that provide educators with a clear understanding of the expected level of student learning and guidance. Indicators provide guidance for an assessment of student learning. Indicators also help to distinguish expectations between grade levels.

Nebraska Department of Education Content Area Standards Reference Guide:

https://www.education.ne.gov/academicstandards/Documents/Nebraska%20Standards%20Reference%20Guide_Final.pdf

Organization and Structure of Nebraska’s Social Studies Standards The overall structure of Nebraska’s Social Studies Standards reflects the two-tier structure common across all Nebraska content area standards. The two levels include standards and indicators. At the broadest level, standards include broad, overarching content-based statements that describe the basic cognitive, affective, or psychomotor expectations of student learning. The standards, across all grade levels, reflect long-term goals for learning. Indicators further describe what students must know and be able to do to meet the standard and provide guidance related to classroom instruction. Additionally, the indicators provide guidance related to the assessment of student learning. In addition to standards and indicators, the Nebraska Social Studies standards provide examples. The “For example...” statements provide guidance relative to topics that may be included in the locally determined curriculum. These suggestions may be used to meet the learning expectations of the standards and indicators. For grades K-8, the standards and indicators are written at grade level. The K-8 standards and indicators are organized within four disciplines: Civics, Economics, Geography, and History. Within those disciplines, standards and indicators are grouped by big ideas. Big ideas are concepts, themes, or issues that give meaning and connection to facts and skills (Wiggins and McTighe, 2005, p. 5). The high school standards and indicators are written within one grade band (HS = 9-12), and they are also organized by discipline and big ideas. Prior to each grade level and the high school grade band, a summary statement and theme are included. This provides a high-level overview of what students are expected to learn at that grade level. In addition to a common structure for content area standards, a consistent numbering system is used for content area standards. (Source: Nebraska Social Studies Standards, 2019)

An example of the Nebraska Social Studies Standards numbering system is as follows:

SS.8.1.2.a
SS = content area
8 = grade level
1 = discipline
2 = standard
a = indicator

Textbook replacements

Textbooks that have been lost or damaged should be replaced annually by individual buildings. District adopted resources can be purchased through the annual order using district-allocated off-formula funds. No class sets should be used.

Use of Video in Instruction

The use of video (i.e., DVDs, videotapes, streaming video, YouTube, etc.), when used to judiciously, can effectively promote student learning in the classroom. Brain research shows that students in grades K-7 can generally attend to instruction for 5-12 minutes while older adolescents can attend for approximately 12-15 minutes before their attention lags (Jensen, 1998). Researchers have suggested that students' focus wanes after 10 minutes of passive viewing of videos (Adams and Hamm, 2001). So, while videos can enrich educational experiences, educators must be conscious of time constraints on a student's ability to attend and process visual media (Schulz, 2006).

When using video, district best practices must be considered and all of the following conditions must be met:

- Copyright laws must always be followed.
- Video may not be used during instructional time for the purpose of entertainment, incentives, or reward. This is a copyright violation.
- The video must be previewed by the instructor prior to classroom use.
- Video that is used in a lesson should be documented in the lesson plan.
- Excerpts should be generally used along with activities requiring active student involvement such as discussion or analysis of the media.
- Complete videos that last more than one instructional period should be used only if they are approved as part of an established curriculum. These resources should be written into curriculum guides and/or maintained by the content area supervisor. A public performance license is required when showing video for entertainment purposes and is permitted only during non-instructional time (i.e. after school, during recess, movie nights, etc.) Movie Licensing USA www.movlic.com/ provides public performance license for schools.
